

Having signed several significant contracts in the Gulf countries to date, Yüksel İnşaat is expanding its area of operation with a new project it has undertaken in the region. The company will construct a 34km-long 2x2 lane motorway in Oman. □

Yüksel İnşaat is commencing its new project in Oman, which has become an important market of the construction sector due to a recent boost in infrastructure investments. Tendered out by the Omani Ministry of Transportation and Communication on 21 October 2014, the construction of the Phase II of Ibri Yanqul Dualized Road will be carried out by a consortium formed by Yüksel İnşaat and Abu Hatim, an Omani company. The mobilization work within the project is already underway. The project site is located 250 km from Omani capital Muscat.
