

Yüksel has been awarded a new project in Qatar named “Construction of PMS (People Mover System) Viaduct for Qatar Foundation - Education City”. The project comprises construction of 1060m long void formed post tensioned reinforced deck viaduct of 8m width with an average height of 5.7m over existing ground level. Two elevated stations namely QNCC (Qatar National Convention Centre) and Sidra will be constructed with architectural finishes, landscaping and MEP works. The duration of the project is 240 calendars days with a maintenance period of 1 year, while the total value is USD 15.3 million.
