

Yuksel has been awarded a new project in Saudi Arabia, the Replacement and Upgrading Infrastructure of King Khalid Hospital in Al Kharj, by the Ministry of Health. The purpose of this project is to refurbish the existing and operational King Khaled Hospital - Kharj, located in the Central Province (The south of Riyadh) of Saudi Arabia. The main components of project are Refurbishment of Main Hospital Building, Health Services Centre, Support & Services Buildings (5 nos.), Apartment and Villas, Liquid, Gas and Medical Storage Tanks with architectural systems including finishes, civil, structural works, mechanical systems (including HVAC, plumbing), electrical systems (including data & telecom and life safety systems), landscaping and parking facilities. The completion period of project is 24 months. The Project, with a total value of SAR 260 million (USD 69 million), was awarded to the partnership of Yüksel-Femco.
